Re: Wetland Border Report
Millennium Drive, Grafton

Dear Client:

In December of 2021 the wetland resources were delineated on land located at the above referenced site (refer to enclosed locus maps). The wetland border was flagged using the criteria in the most recent edition of MA Wetland Protection Act (WPA) and Regulations 310 CMR 10.00 et al and the local Wetland Protection Bylaw. Hydric soil indicators, vegetation changes, hydrological indicators, and topography were all considered for delineation purposes.

One Bordering Vegetated Wetland (BVW) was delineated on site with series GC1-61 and A1-40 and the upland island in the center of the wetland with series GC70-100. This wetland is dominant in red maple, highbush blueberry, winterberry, spicebush, brier, sweet pepperbush and wetland ferns. Department of Environmental Protection BVW field data forms were documented at wetland flag # GC97.

According to the Mass GIS data layers for NHESP, this site is not located within Estimated and/or Priority Habitat of Rare Wildlife and has no mapped vernal pools. The site is not located in an ACEC, within 200-ft of a mapped river or within a FEMA flood zone.

The Local Wetland Protection Bylaw and the MA Wetlands Protection Act take jurisdiction over BVW resources. In addition, these resource areas have a jurisdictional 100-foot Buffer Zone. The wetland bylaw does not appear to take jurisdiction over isolated wetlands. Any work within the resource areas and/or 100-foot buffer zone requires a Request for Determination (RDA) or Notice of Intent (NOI) be filed with the Conservation Commission.
